Ms. Billington

I apologize for the email but the residents of Davenport were not properly notified about the deadline for letters.

I am writing to strongly urge grant money approval for the Davenport Sanitation District grant proposal. Time is of the essence.

Davenport is on a constant Boil Water Notice. The water for the whole town is out of compliance with state standards. Even the local elementary school. Davenport is comprised mostly of modest to low income households yet we have the highest water rates in the County.

We cannot drink the water.

We cannot pay for the water.

We cannot get the powers that be to take their responsibility to make the water safe.

We are desperate.

Please fund this proposal through the Proposition 50 Integrated Regional Water Management Implementation Grant Program and save the town of Davenport.
